

Table 1. U.S. Resident Population and the Components of Demographic Analysis by Race and Sex: April 1, 2010
(In thousands)

Component	Total population	Black			Non-Black		
		Both sexes	Male	Female	Both sexes	Male	Female
Total population	308,346	41,196	20,136	21,060	267,150	132,920	134,229
Population aged 0-74 years	290,051	39,748	19,636	20,112	250,304	126,248	124,055
Births	276,312	40,946	20,748	20,198	235,366	120,831	114,535
Deaths	23,178	4,743	2,881	1,862	18,435	11,553	6,882
Net international migration	37,346	3,631	1,838	1,793	33,716	17,279	16,436
Armed forces overseas	429	86	69	17	343	309	34
Population aged 75 years and over							
Medicare-based estimates	18,294	1,448	500	948	16,846	6,672	10,174

Notes:

The estimates shown are from the revised 2010 Demographic Analysis middle series estimate.

Estimates may not sum to totals shown because of rounding.

In this table, Black is the sum of the Black alone population aged 0-29 years and the Black population aged 30 years and over. Estimates of the population aged 30 years and over are classified as Black and non-Black, with no further distinction as to whether Black refers to Black alone or Black alone or in combination with other races.

Births, deaths, and net international migration for the estimates refer to events occurring between April 1, 1935 and March 31, 2010.

Net international migration includes the international migration of both native and foreign-born populations. Specifically, it includes: (a) the net international migration of the foreign born, (b) the net international migration of the native born, and (c) the net migration between the United States and Puerto Rico.
